WHATS THIS?

NoSpamPlus Is a Simple Api To get Info About Spammers/Scammers Or Whatever. Use it To make Telegram Spam Free.

WHY USE THIS?

There is Lots Of Antispam In Telegram, But Why Use This? We Have Seen These Apis Admin Only Banning Users From Specific Country, Critising Them. We Have Mission Not To Do anything Like that. We Believe We All Are Humans And We Are One World

Well, For Token You Can Contact @NospamPlusBot On Telegram. Or Pm @StarkXd

3.1 Requirements

Basically, We Only Need Python 3.5+ And Requests Library.

3.1.1 Python

You Can Install Python From <https://www.python.org/downloads/>

3.1.2 Requests

Install Requests By Running The Following Command or Adding To Your requirements File:

```
pip3 install requests
```

Make sure Its On Latest Version

3.1.3 NoSpamPlus

Install With Pip

```
pip3 install NoSpamPlus
```

Make sure Its On Latest Version For Better Result.

3.2 Examples Usage

3.2.1 Python

You Have To Enter Token In token Parameter And User Id You Wanna Check in userids

```
from nospamplus.connect import Connect
mytoken = 'your_token_from_nospamplusbot'
token_connect = Connect(mytoken)
user = token_connect.is_banned(12974624)
print(user.ban_code)
print(user.reason)
```

3.2.2 PHP

```
<?php

$userids = 1295;
$token = "yourtokenhere";

echo file_get_contents("http://NoSpamPlus.tk/info/?userid=$userids&token=$token");

?>
```

3.3 NoSpamPlus And Telethon

3.3.1 Telethon

Lets Try To Ban A User As Soon He Arrives In Chat.

```
from nospamplus.connect import Connect
sclient = Connect('tokenhere')
@client.on(ChatAction)
async def ok(event):
    if event.user_joined:
        juser = await event.get_user()
        user = sclient.is_banned(juser.id)
        if user:
            await event.reply(
                f"***#ANTISPAMINC** \n**Detected Malicious User.** \n**User-ID : ** `
↳{juser.id}` \n**Reason : ** `{user.reason}`"
            )
            try:
                await client.edit_permissions(
                    event.chat_id, juser.id, view_messages=False
                )
            except:
                pass
        else:
            pass
```

3.4 Support Panel

You Can Join Our Telegram Group / Channel To Seek Support. Basically, You Can Appeal, Report A Person Or Even Ask Questions About Our Api. Please Be Polite.

Support Group : @NoSpamPlusChat

Channel : @NoSpamPlus

Bot : @NoSpamPlusBot
